

Letter of Intent for Participation in the BalticGoesGreen Project

The project proposal BalticGoesGreen with a multi-level governance approach, where regions cooperate with municipalities to build the capacity of these municipalities, is very interesting to us. We, the municipality of Lekeberg, are happy to support the project as an associated partner.

The BalticGoesGreen project will be useful in supporting our objectives for the city regarding green transport, in developing modules for a sustainability plan for the region and in formulating requirements for harmonising roadmaps. Of special interest for us are:

Increased charging infrastructure in our area

The development and use of hydrogen

Development of procurements linked to green transport

Reducing emissions and

Fostering details and implementation for green transport in our city.

We will work closely together with Region Örebro in the project.

We hope that the associated partnership in the project will enable us to raise the use of clean energy in transport and mobility in the city.

Kind regards,

Gustav Olofsson
Kommundirektör
Lekebergs kommun
